

EN010082 Tees CCPP

Appendix 1

SWQ 2.5.1

Email to Applicant dated 14 June 2018

Sent: 14 June 2018 09:44

Subject: Tees CCPP Project WFD

Dear Carol,

As requested, please find below our WFD comments and request for further information as discussed at the hearing.

As discussed at the Issue Specific Hearing on Environmental Matters on 13 June, we have reviewed the information submitted to the Examiner by the applicant on WFD matters in response to our written representations and written questions.

A WFD assessment of potential impacts on water bodies should assess a) how the proposed development together with existing physical modifications might lead to deterioration; and where the water body is already at less than good status b) whether the proposed development would prevent implementation of any measures in the RBMP; c) identify other practical opportunities to improve the water body as part of the proposed development.

We consider that the information submitted identifies that the proposals for the development site are unlikely to affect a) or b). However, it is not clear whether the applicant has assessed the potential for c). We would ask that this information is submitted by the applicant.

Regards,

Louise
