Please can we notify you as we intend on commencing dredging at the locations on the drawing (the green HOLDING BASIN and the orange 65M CHANNEL) to a target depth of 9.0 mCD using the UKD Marlin commencing on 13th September 2021 for approx. 48 hours.

Able intend to commence dredging at the location shown on the accompanying drawing.

This is an update on the notification submitted on 8/12/22. Works are now extended to cover the areas shown on the accompanying drawing.

This is an update to the drawing submitted under R1.7 showing both capital & maintenance dredge works on Q10& Q11.

|                                                             |                                                                                                                                                                  |                                                                                                                                                                                              |

Year one samples must be taken in December 2023 and Year two samples taken in December 2024. The relevant sediment sampling and analysis must be completed by a laboratory validated by the MMO at least 6 weeks prior to the end of years one and two from the date of issue of the licence variation. This must be submitted to the MMO for review for two years consecutively unless otherwise agreed and/or required by the MMO. | PAH results for SC1, SC2 and SC3 included in the attached files. All sites were sample in December 2023 but sample SC3 was damaged in transit and re-sampled in February |
