Licence(s) to be varied

☒ L/2017/00012/6 (Marine Licence)

What would you like to vary about your current licence(s)/response(s)?

Where the current licence does not permit the use of erosion control matting, Able wish to vary the licence in order to add the erosion control matting to the existing licence.

To support this update, I have appended a document which outlines the summary of changes and provides a review of the original HRA assessment.

Amend the existing coordinates on the main licence for 'Able Seaton Port, Quays 10 and 11' as there is an error. Additional coordinate has been provided. No areas outside existing 'licenced area' will be affected. The area included within the revised coordinate was also assessed in the original HRA.

Why would you like to vary your licence(s)/response(s) in this way?

We are proposing to carry out capital and maintenance dredging at Quay 10 and 11 at Seaton Port. This will include dredging at the eastern end adjacent to land fronting the Power Station. This request is to have the ability to install erosion control matting over the area of the berth where slopes will form from dredging activities. This is to protect the land adjacent to the berth from erosion impacts.

What date would the varied licence(s)/response(s) come into effect?

10-JAN-2021
