Thank you for sending details of this planning application.

We are supportive of the development from an economic development perspective in that it offers employment opportunities for local residents and subcontract opportunities for local business. We would encourage the developer to engage with our team at the earliest opportunity to explore ways to promote their proposals to the wider community to ensure they are able to attract the skills and specialisms they require for the project. We would also request that they endeavour to maximise the local content on this project and we are very happy to support them to do so.

Regards
Margie
