Taking into account the content of the report the recommendation is to *partially* discharge condition 12 of R/2020/0357/OOM in so far as it relates to the area of land illustrated on plan TW-SIZ-XX-JBAU-SB-00-DR-C-0001 Rev C02:

- 12 **Prior to the commencement of the development, or in accordance with the phasing plan agreed through discharge of condition 4, details shall be submitted to and approved in writing by the Local Planning Authority of the Surface Water Management and Maintenance Plan, unless otherwise agreed in writing. Thereafter it shall be implemented in accordance with the approved details.**

REASON: To ensure the development is supported by a suitably designed surface water disposal infrastructure scheme which is appropriately maintained and to minimise the risk flooding and contamination of the system during the construction process and in the locality minimise."

REASON FOR PRE-COMMENCEMENT: A pre-commencement condition is required to ensure that excavations and groundworks do not compromise the installation of the approved surface water drainage infrastructure.

Informative Note: Only the conditions listed above have been formally discharged.

Failure on the part of the developer to fully meet the terms of any conditions which require the submission of details at appropriate stages during the development, will result in the development being considered unlawful and may render you liable for formal enforcement action.

Failure on the part of the developer to observe the requirements of any other conditions which do not require submission of details could result in the Council pursuing formal action in the form of a Breach of Condition Notice.
