Environmental Protection Planning Consultation Response

Proposal:	CONSULTATION ON PINS REF: EN0700009
Premises:	H2 TEESSIDE DCO PROJECT, Redcar

Comments:

With reference to the above planning application, I would confirm that I have assessed the following environmental impacts which are relevant to the development and would comment as follows:

Chapter 6.5 of H2 Teesside Ltd Environmental Impact Assessment Scoping Report concerns Noise and Vibration.

The report states that baseline noise data is available from the results of surveys which were undertaken in 2019 and 2020 for the NZT Project (immediately east of the Proposed Development Sites). From a review of the available data, the existing dominant sound in the area is from industrial and road traffic noise sources, however further project specific baseline noise monitoring will be carried out to inform the noise and vibration assessment for the Proposed Development.

I have no objections to the methodology and scope for further assessment stated in the report.
